Bulletin Details

Summary

Announcing the introduction of the Mitel 6900 IP phones with the MiVoice Connect platform, planned GA September 30th, 2019. The 6900 IP Phones are Mitel's premium phone family with a rich set of accessories and features that will be tightly integrated with the MiVoice Connect platform for a superior user experience.

6940   **6930**   **6920**   **6910**

Target Market / Opportunity / Positioning

The Mitel 6900 IP phones will enhance the MiVoice Connect solution offer and provide additional choice of endpoints together with a rich choice of accessories. Users of MiVoice Connect will be able to use the new family of premium phones to enhance the way they communicate in their businesses.

Product Overview / Features & Benefits / Description

The Mitel 6900 IP series offer initially includes four models to match the needs of business at all levels. The phones and accessories are tightly integrated with the MiVoice Connect platform, support advanced telephony functions, and deliver outstanding high definition audio.

- 6940 IP Phone – A powerful executive model that gives business leaders the edge with a 7" color touch screen, cordless voice optimized handset (standard with 6940 IP model), application integration, and twelve programmable keys.

- 6930 IP Phone – A phone designed for the power users who want to maximize their communication experience with vivid 4.3" color displays and full set of 6900 accessories.

- 6920 IP Phone – A high value phone with balanced combination of flexibility and reliability with a 3.5" color display, programmable keys and accessories for use at all levels of business.

- 6910 IP Phone – A standard level phone offering high quality HD voice, 3.4" backlit display, 8 programmable keys and EHS/DHSG headset support.

The Mitel 6900 IP series also support a wide range of accessories designed to increase workplace mobility and improve workflows:

- M695 Expansion Key Module – add up to 28 programmable keys to 6900 IP phones, increasing productivity for users who need to monitor multiple phone lines and busy lamp fields. Up to 3 modules can be linked together for up to 84 extra keys.

- Integrated DECT Headset – Delivers a connection range of 300 feet (100 meters) to untether users from their desk and improve multitasking functions.

- Cordless Bluetooth Handset – Voice optimized for user to enjoy clear conversations without the constraints of handset cord. (Standard on 6940 IP)

- WLAN Adapters – Delivers connectivity to the MiVoice Connect network in places where wires cannot go. Eliminate the need for cords with the WLAN Adapters for a completely wireless workstation.

- S720 Bluetooth Speakerphone – Benefit from completely hand-free communication and covert any room into a conference room with crisp audio.

Market Introduction Schedule

The planned Ready to Order (RTO) date for authorized channel partners is 1st September 2019.

The planned GA date for both new MiVoice Connect platform software and new 6900 phone firmware is 30th September 2019.

Demo Kits

No specific demo kit is available for these phones. They may be used for demos with MiVoice Connect in the same manner as IP400 Series phones are today.

Warranty

The Mitel 6900 IP hardware products are supported under Mitel's standard 12-month warranty

Configuration Information

The 6900 phones require customers to have active MiVoice Connect accounts. The 6900 IP phones may be added to any MiVoice Connect system (once upgrade to the latest firmware release). They may coexist with the IP400 Series phones.

Training

Mitel will expand both technical and end user training to cover the 6900 phones within a MiVoice Connect solution.

Manufacturer Discontinue

The 6900 IP Phones are being added to the existing portfolio of IP400 Series phones for MiVoice Connect. No current products are being discontinued with this announcement

Questions & Answers

Q: Why do we need new 6900-part numbers?
A: 6900 firmware is changing to support MiVoice Connect out-of-box deployment features. Existing 6900 stock in the channel does not support this. To guarantee the correct version of phones are shipped to MiVoice Connect installations, new 6900 SKUs have been created.   Once we can guarantee all variants of 6900 phones have the latest firmware we will revert to the original 6900-part numbers for all our platforms and all solutions.

Q: Will the 6905 and 6970 be supported on MiVoice Connect?
A: 6905/6970 will not be supported for the first release of 6900 on MiVoice Connect. Mitel intends to add both 6905 and 6970 support in a future release. Only the 6940, 6930, 6920, and 6910 models will be supported at launch.

Q: Are existing 6900 accessory/spares SKU's applicable to MiVoice Connect?
A: Yes! Existing accessories and spares are common to all variants of 6900 phones.

Q: Will there need to be new firmware for the MiVoice Connect server to support 6900 phones?
A: Yes. To support 6900 phones the Connect server firmware will need to upgrade and is planned follow the same schedule as new firmware for the 6900 phones. Both plan to be GA 30th September 2019.
